

The Avenues is huge and also the biggest mall in Kuwait. I would like to tell you about it and try to mention every tiny nice detail there. I'll start to describe the Avenues from the outside. The Avenue's color is light beige, with a lot of windows so the sun's bright light comes inside the mall. The space of the parking is really huge, that thousands of people can park their cars in that gigantic parking place.

The first time I saw the Avenues, I felt like I wanted to explore it. I said to myself "wow, what does that huge building have inside?! It looks like it's a tiny country!" Inside, you'll see a different world there. The Avenue's smell is mostly food, sweet food like chocolate and coffees, and you can also smell rice and different nice smells, but the best smell there is when you go to the amazing perfumes that they sell. When you go inside even one shop, you'll go crazy and want to buy everything! The Avenues has entertainment places, toys shops, shoe shops, clothes shops, perfume shops, makeup shops, watches shops, electronics shops, plants shops, art materials shops, cooking materials shops, home furniture shops, and mostly anything you need to survive. There are also delicious food they make in the restaurants and cafes there, including, they have a perfect hotel to sleep there.

The best shops there I'll explain about it. One of the shops there I really love is Smiggle, when you go inside the shop you'll see a lot of colors there and you'll see everything they make is not ordinary, either have a beautiful shape or have a smell, and more if you go deep in the shop. Other shops are Justice and Claires, they are different shops but they are kind of the same, but the good thing is that both have great things in the shop, like soft and smooth and at the same time, relaxing pillows, that if you touch them you don't want to let go of these gorgeous pillows, you sure will buy them. In there, they have creative and colorful diaries. They also have necklaces and bands and earrings that will bring the smile to children's face. A third shop that have good things to sell is Zara, it is a shop where mostly you can buy clothes to go out, that have nice decorations. Another clothes shop is Mark & Spencer shop. They have amazing clothes, but the thing I really love there is their pajamas, they are really comfy and don't hurt our skin when we're awake and sleeping.

Continuing on the best shops, one of them is Pottery Barn. If you come inside that huge shop you'll be breathtaking! You'll see amazing sofas, tables, chairs, desks, beds, curtains, carpets, and more. When I saw all that, I felt like I wanted to do our house again, and buy new home furnitures only from Pottery Barn. I almost forgot to tell you about the best shop in the world I like in my opinion, which is That Al Salasil. Actually, it is a bookstore, when I came in, I thought I was dreaming! I also said to myself "if it was a dream, I don't want to wake up from it!" But it was not a dream, almost every book I wanted to read was in that book store. The last thing I wanted to talk about is not a shop, it is an entertainment place, which is Kidzania. Kidzainia is a really entertaining place, it makes children proud of themselves because in Kidzania they are working or they have work to do. Like they can be a doctor, firefighter, police boy or girl, pharmacist and more work that adults do. They also make chocolate and different kinds of yummy food. The Avenues has almost everything you need, you need to go there! To know, the shops I told you about are not the only nice shops there, they are the best shops in my opinion.
